

LEGION IMPLEMENTATION GROUP

Capability Statement · AI Implementation for Federal, State & Local Government

legionig.tech · admin@LegionIG.tech · (214) 865-9092 · San Antonio, TX

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS · SBA VETCERT CERTIFICATION IN PROGRESS

WHO WE ARE

Legion helps government agencies deploy practical, compliant AI systems that reduce backlogs, speed service delivery, and improve workforce productivity — with governance, documentation, and human-in-the-loop controls built in. Veteran-led, deliberately lean, and scaled per engagement through a vetted network of senior specialists and teaming partners.

CORE COMPETENCIES

- **Casework & Backlog Automation**
Triage, draft, and route high-volume casework — permits, benefits, FOIA, constituent inquiries — with human review on every action.
- **Agency Copilots & Citizen Services**
Domain-specific assistants for staff; multilingual public-facing copilots that escalate edge cases with full context.
- **Records & FOIA Intelligence**
Search, summarize, and prepare document-heavy records workflows with consistent redaction logic and full audit trail.
- **Procurement & Grant Acceleration**
RFP/RFQ analysis, grant drafting, and compliance-matrix generation for buyers and responders.
- **AI Readiness Assessments & Governance**
2–4 week fixed-scope assessments mapped to NIST AI RMF and OMB M-25-21 / M-25-22, with prioritized roadmap and ROI estimates.
- **Workforce Enablement & Knowledge Transfer**
Hands-on training and documentation in every engagement — no perpetual-vendor dependency.

DIFFERENTIATORS

- Veteran-led, mission-style execution: defined phases, measurable outcomes per phase, no theater.
- Targets set against baselines agreed with the agency before work begins — never guaranteed outcomes.
- Compliance-aware by design: delivery aligned to NIST AI RMF and NIST SP 800-53/171; FedRAMP-authorized cloud services where required.
- Human-in-the-loop governance and no-black-box architectures, documented for AO and IG review.
- Right-sized engagements scoped to your fiscal cycle and award authority.

COMPANY SNAPSHOT

PRIMARY NAICS	541512 — Computer Systems Design
ALSO CODED	541511 · 541519 · 541611 · 541715
OWNERSHIP	100% service-disabled-veteran-owned
SAM.GOV / VETCERT	Registration & certification in progress
UEI / CAGE	Published upon SAM.gov registration
FOUNDED / HQ	2026 · San Antonio, TX · nationwide remote

ENGAGEMENT MODEL

- **01 Discover**
Embedded workflow, data, and constraint review.
 - **02 Design**
ROI-scoped roadmap fit to your stack and security posture.
 - **03 Deploy**
Tight iterations with your team in the loop; target of first production deployment within 90 days.
 - **04 Sustain**
Training, documentation, and optional ongoing support.
- Targets, not guarantees — results depend on agency environment, data access, security requirements, and procurement timeline.

CONTRACT ACCESS

- Small-business awards and full-and-open competition today.
- SDVOSB sole-source (FAR 19.1406, up to \$5M services) and set-asides upon SBA VetCert certification.
- Subcontract teaming on partner GSA MAS, OASIS+, CIO-SP4, SeaPort-NxG, and Alliant 3 vehicles.
- Mentor-Protégé inquiries from established primes welcomed.

PAST PERFORMANCE

Legion is a newly formed firm and does not yet claim completed federal past performance. Representative engagement patterns — clearly labeled as illustrative — are published at legionig.tech. Key-personnel resumes provided with proposal submissions.
